

gvSIG
association

**Association for the promotion
of FOSS4G and the
development of gvSIG**

gvSIG Association: New ideas for a new model.

The gvSIG Association aims **gvSIG** project **sustainability** and the **development** of the **Free Geomatics**.

The Association raises a **new business model** around Free Software **democratic values**, based on **cooperation and shared knowledge**, where part of the generated benefit reverts on the strengthening of the gvSIG project.

The sustainability of the gvSIG Project is based on maintaining the **gvSIG Professional Structure** and the necessary infrastructures of the gvSIG Community.

Geographic information has become a **key factor for management**. The 80% of it managed by an organization has a special character.

We bet for the **benefits that free software provides, as well as the use of standards**.

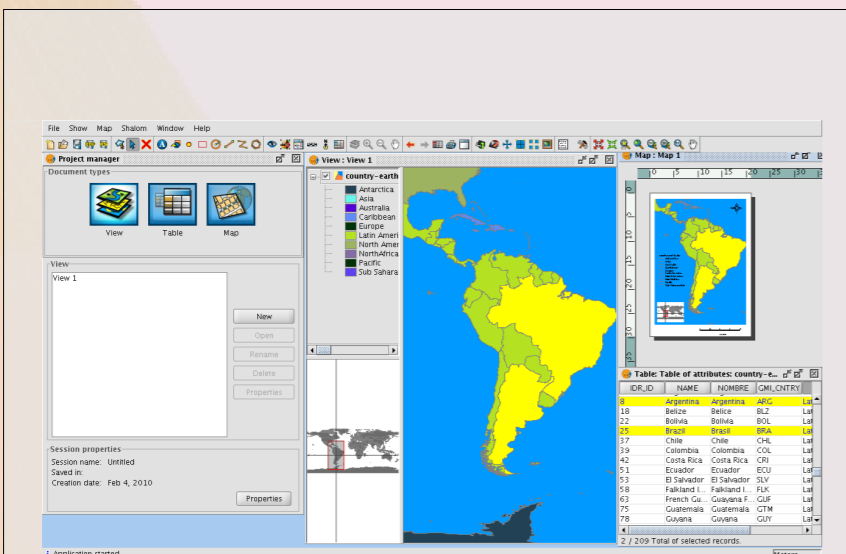

Quality and experience in a proposal based on the **technological independence, interoperability** and **shared knowledge**.

We have **experts** in various technologies and **free geomatics** projects.

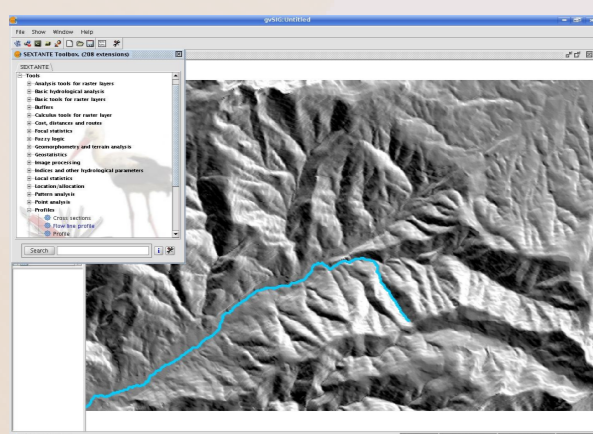

Consulting and software development, technical support and training
