gvSIG Day 22nd June 2011

OSGIS 2011

Third Open Source GIS UK Conference (CGS, University of Nottingham, UK)

Contents

- 1. gvSIG Project***
- 2. gvSIG Association***
- 3. gvSIG Community***
- 4. How to collaborate***
- 5. gvSIG official projects***
- 6. Cases Studies***

1. gvSIG Project: Origin

- gvSIG was born in **2004** at the Regional Ministry of Infrastructures and Transport (CIT) of Valencia (Spain).
- Framework of a **full open source computer system migration** called gvPONTIS
- There was no advanced FOSS for GI management to replace closed source GIS tools.
- To **develop** a GIS product called **gvSIG**, investing money on a FOSS tool, avoiding wasting it on closed source licences.

1. gvSIG Project: Origin

FOSS philosophy

- *Economic and political aspects:*
 - To convert acquired knowledge into **sharing knowledge**, avoiding that sharing knowledge will be closed again (**GPL license**)
 - To create **local industrial fabric: new business model**
- Technical aspects:
 - **Modularity** in order to make the collaborations easier
 - Following the OGC standards and INSPIRE
 - **Internationalization:** Translation management, due to location of software is important to FOSS.

1. gvSIG Project: Origin

Two main products:

- **gvSIG Desktop** (Pcs/indoor)

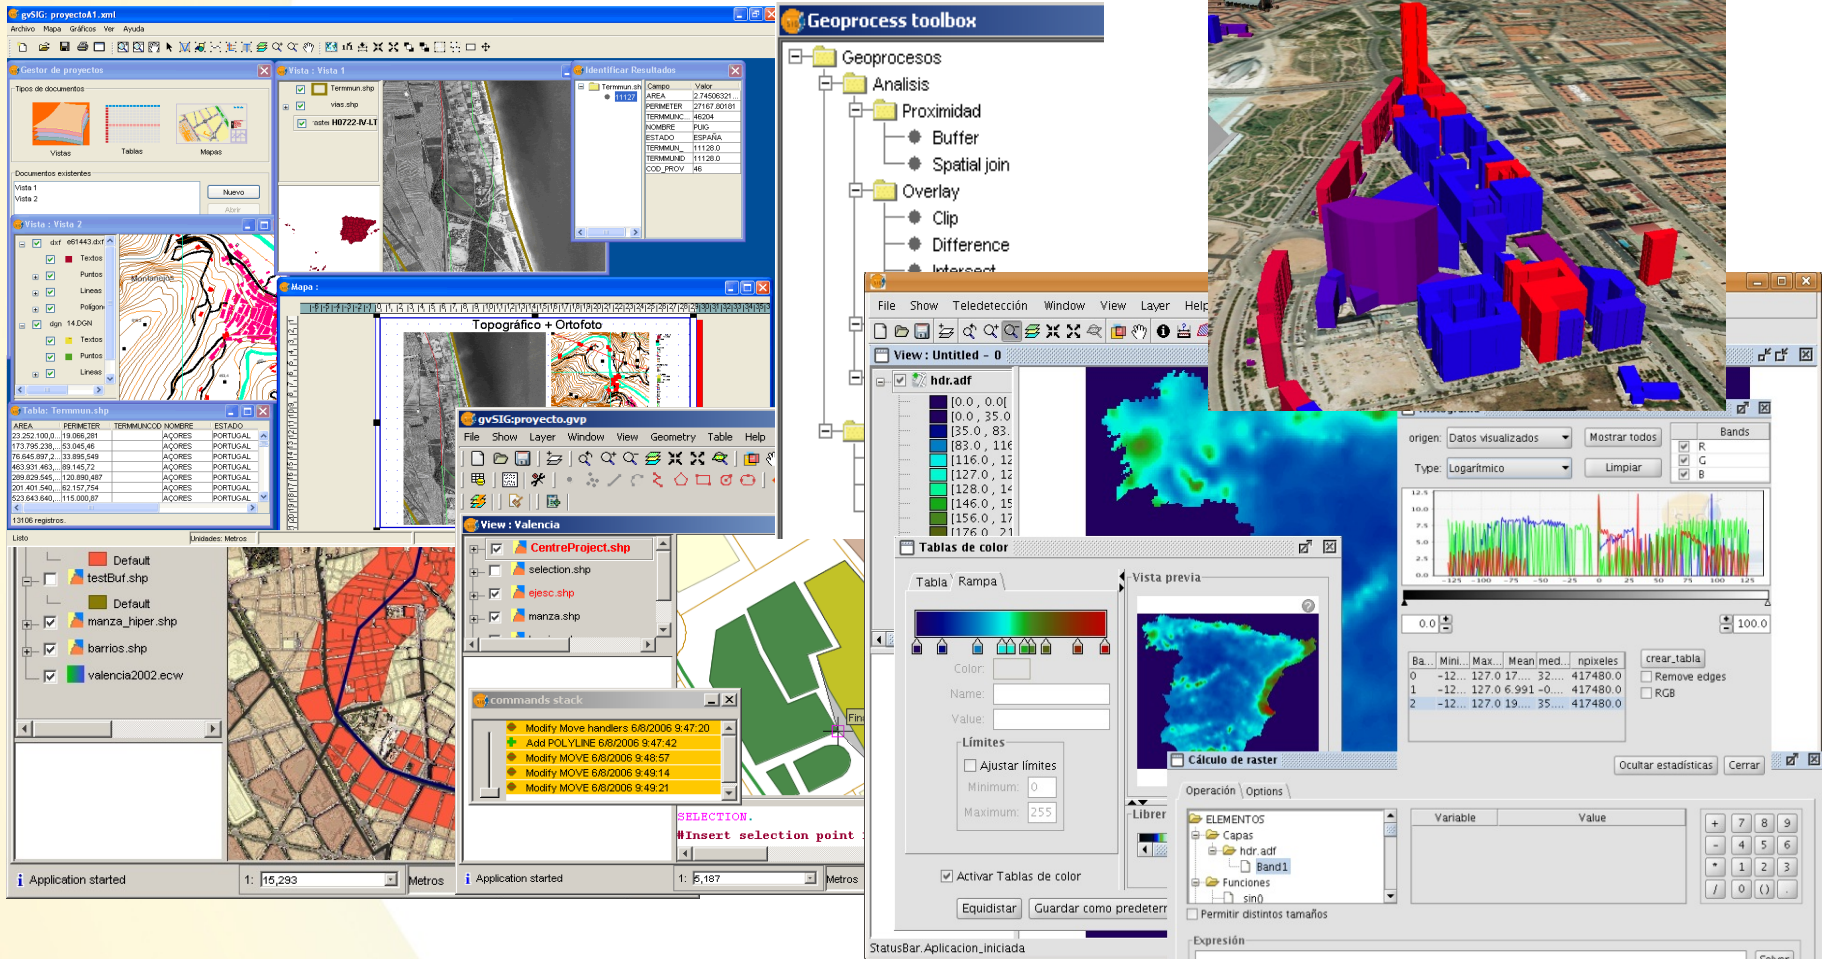

- **gvSIG Mobile** (mobile devices/outdoor).

1. gvSIG Project: gvSIG Desktop

- gvSIG Desktop is nowadays **one of the most complete FOSS applied to GI management**. It includes GIS as well as SDI features.
- Features:
 - GI visualization: several formats, CRS management
 - Map representation: symbols and labelling
 - Geoprocessing
 - Printing outputs
 - Editing
 - Updating
 - Image processing and remote sensing support
 - LIDAR support
 - SDI access: WMS, WFS, WCS, WPS, ...
 - SDI outputs to publish by Mapserver or Geoserver
 - 3D GIS: planar and globe views

1. gvSIG Project: gvSIG Desktop

The screenshot displays the gvSIG Desktop environment with several key components:

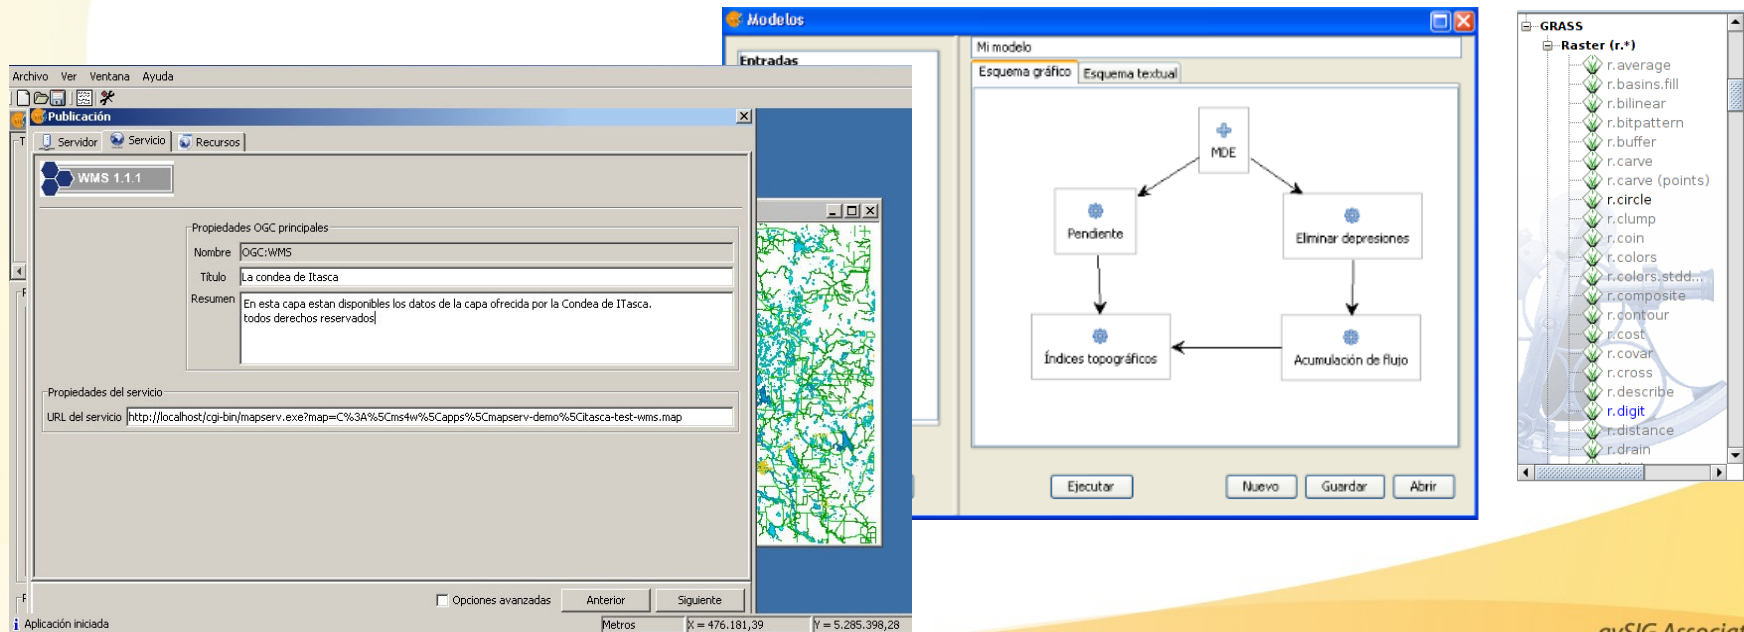

- Geoprocess toolbox:** A tree view on the right side containing folders for 'Geoprocessos', 'Analisis', 'Proximidad' (with sub-items: Buffer, Spatial join), 'Overlay' (with sub-items: Clip, Difference, Intersect), and 'Intersect'.
- Map View:** The main central window showing a 'Topográfico + Ortofoto' layer. It includes a legend on the left with layers like 'Default', 'testBuf.shp', 'manza_hiper.shp', 'barrios.shp', and 'valencia2002.ecw'. A 'commands stack' window is open at the bottom, listing recent actions such as 'Modify Move handlers 6/6/2006 9:47:20'.
- Layers Panel:** A table at the bottom left showing the 'Terminan.shp' layer with columns for AREA, PERIMETER, TERMINANCO, NOMBRE, ESTADO, and COORD_PROV. The table contains 13106 records.
- 3D View:** A 3D perspective view on the right showing a city model with buildings in red and blue, overlaid on an aerial photograph.
- Color Table and Histogram:** A 'Tablas de color' dialog box is open, showing a color ramp and a histogram for the 'hdr.adf' layer. The histogram shows a distribution of values across a range from -12.0 to 125.0.
- Project Manager:** A window at the top left titled 'gestor de proyectos' showing a list of project documents and their locations.

1. gvSIG Project: gvSIG Mobile

1. gvSIG Project: gvSIG Desktop

- Integration to other FOSS4G projects:
 - **Sextante**: more than 200 features, geoprocessing modeller.
 - **Mapserver and Geoserver**: publishing web services directly from gvSIG views.
 - **Grass**: access to all its features on the gvSIG view.

1. gvSIG Project: gvSIG Mobile

- It allows GIS experts to edit/update “in situ” GI
- Features:
 - GI visualization: several formats, CRS management
 - Map representation: symbols and labelling
 - GPS support: manual and automatic
 - Editing, editing GI
 - Selecting and searching data
 - SDI access: WMS, WFS...
 - POIs management, DDBB storage
 - Measuring and info features

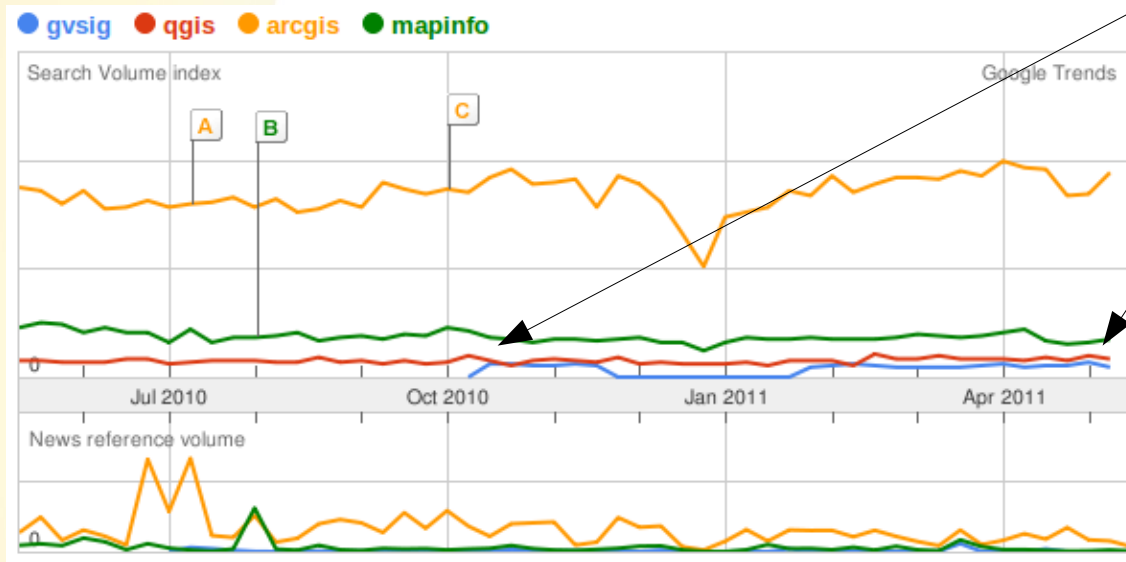

1. gvSIG Project: Evolution

- **2004:** Beginning of the project
- **2004-2008:**
 - Regional, national and international interest
 - Community users and developers
 - Cluster of SMEs: Business Model
 - Infrastructure and Professional Structure (coordination of community)
- **2009: gvSIG Association:** Sustainability
- **2010: Communities.** Local /Thematic/...
- **2011:** gvSIG Association becomes in an international reference in FOSS4G.....and we keep growing!!!

gvSIG's Ecosystem

Contents

- 1. gvSIG Project**
- 2. gvSIG Association**
- 3. gvSIG Community**
- 4. How to collaborate**
- 5. gvSIG official projects**
- 6. Cases Studies**

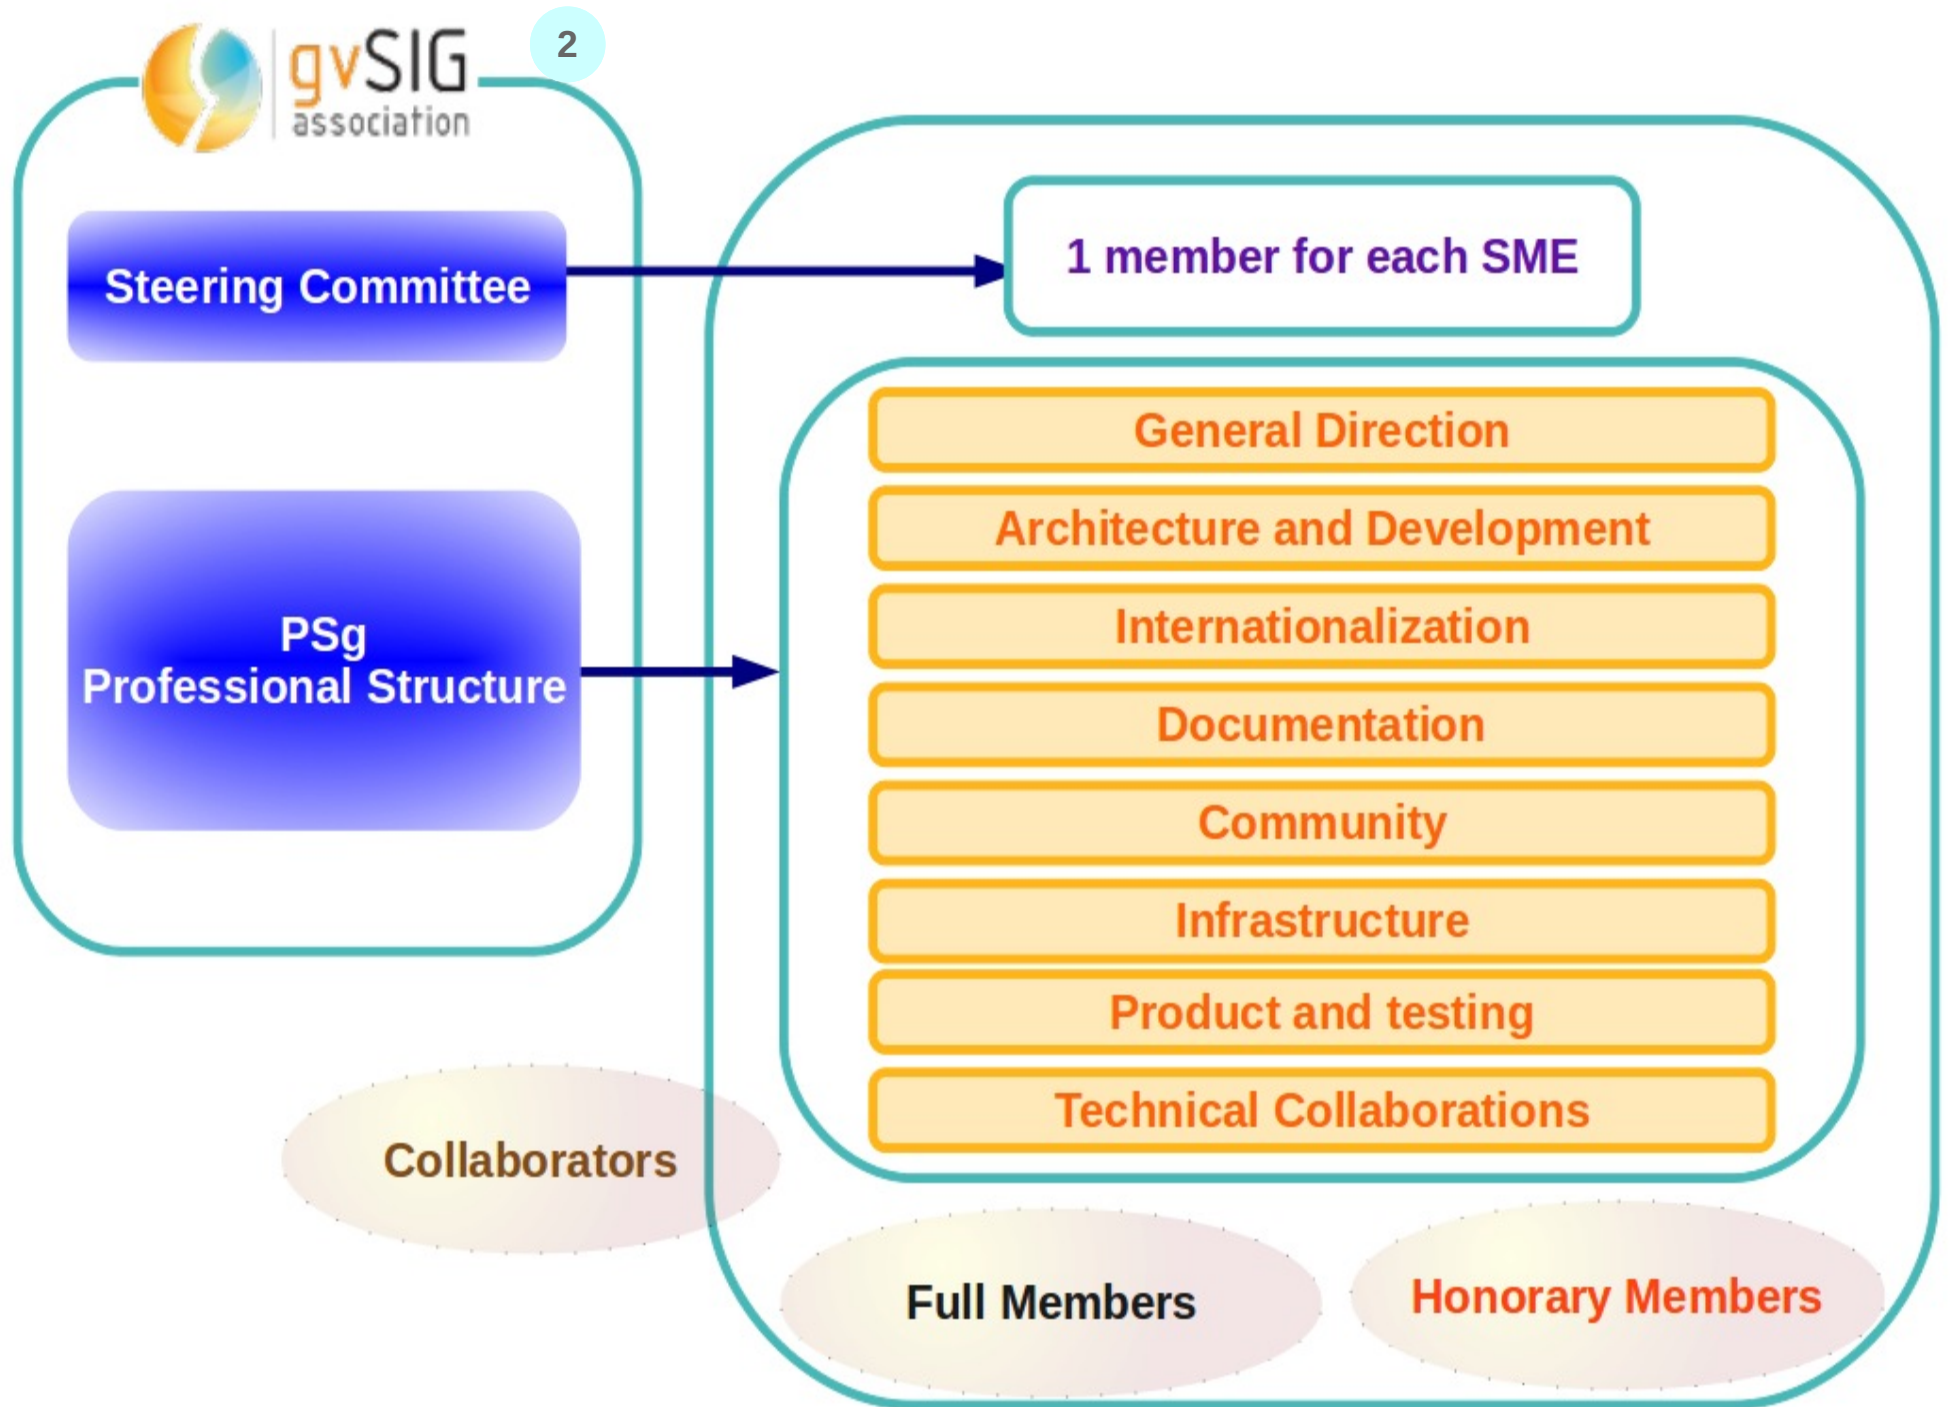

2. gvSIG Association

- **Objective:** To promote the development of gvSIG Project and FOSS4G
- **Common area for universities, administrations and SMEs**, to generate synergies between all of them
- Promotes the development of a **new business model** based on cooperation and shared knowledge
- To assure **the sustainability of the gvSIG Project**

2. gvSIG Association

Business Model

- Focused on **SMEs: Competitive industrial fabric**
- Members:
 - **Full Members** (SMEs)
 - **Collaborators** (SMEs)
 - **Honorary Members:** (Universities, R&D centres, Mapping Agencies, etc.)

2. gvSIG Association

2. gvSIG Association

Collaborators (SME)

The map features the following text-based country representations: CANADA, USA, MEXICO, GREENLAND, BRAZIL, ARGENTINA, CHINA, INDIA, AUSTRALIA, and many others. Red arrows connect logos to specific geographic areas:

- Left Column:**
 - TERRA GIS (pointing to Canada)
 - IDEASG (pointing to USA)
 - OpenGEO GAUSS (pointing to South America)
 - xoomcode (pointing to South America)
 - geo openource (pointing to South America)
- Bottom Center:**
 - EDUATION GIS SOLUTIONS (pointing to Africa)
- Right Column:**
 - Georepublic (pointing to Europe)
 - gismap (pointing to Europe)
 - OSID (pointing to Europe)
 - DIELMO (pointing to Europe)
 - enosat (pointing to Europe)
 - SIG A MAP (pointing to Europe)
 - enxenio (pointing to Europe)
 - excentia (pointing to Europe)
 - giservices.eu (pointing to Europe)
 - M Model Driven Development (pointing to Europe)
 - Sixtema (pointing to Europe)
 - geodat (pointing to Europe)
 - gis (pointing to Europe)
 - avansig (pointing to Europe)
 - sopde.es (pointing to Europe)
 - EMERGIA (pointing to Europe)
 - Avalon (pointing to Europe)
 - SIGTel (pointing to Europe)
 - VERTEx (pointing to Europe)

2. gvSIG Association

Business Model

- Collaboration between all of them in order:
 - To belong a big network of entities all over the world to spread business based on FOSS4G
 - To prepare public tenders together to achieve big projects as a competitive alternative to the private software
 - To participate in FOSS4G R&D projects

2. gvSIG Association

Professional services

- **Consulting and software development**
 - gvSIG: customizations, migration and system implementations,...
 - FOSS4G: Geoportals
- **Technical support**(users and developers)
- **Training** :*(in situ or on-line platform: <http://gvsig-training.com/>)*
 - gvSIG and gvSIG Mobile: Official Certification
 - FOSS4G Technologies: *(Mapserver,PostGIS,OGC,etc..)*
- **Certification:** Based on the acquisition of a range of knowledges, which will ensure the skills of the students in the gvSIG products and / or FOSS4G.

2. gvSIG Association

Benefits

- Part of the benefits from the business activities will go back into the gvSIG project to get its **sustainability**

2. gvSIG Association

<http://www.gvsig.com>

2. Do you want to join us?

Steps

- 1) Identify your profile: University, R&D Centre, SME(,..etc.
- 2) Indentify your interest and needs on gvSIG
 - To make business around gvSIG (Collaborator)
 - To participate in European R&D Projects: EUREKA, ITEA-2, EUROSTRAS,etc. As: SME, R&D Centre or University.
 - To impart training with gvSIG at the University
 - To be a member or a coordinator of Local/thematic gvSIG Community in UK
 - etc.....
- 3) Please, put in contact with the PSg !!!!

Contents

- 1. gvSIG Project***
- 2. gvSIG Association***
- 3. gvSIG Community***
- 4. How to collaborate***
- 5. gvSIG official projects***
- 6. Cases Studies***

3. gvSIG's Community

- gvSIG is a FOSS project, hence its **community is its major value.**

3. gvSIG's Community

- The Community around gvSIG is composed of **individuals** and **entities**:
 - **People** from Universities, companies and Public Administrations.
 - **Institutions** (one upper level of participation):
 - Universities (Labs, Faculties, etc.),
 - Companies (SMEs)
 - Public Administrations
- The main idea is that all these people have a common interest: **gvSIG and FOSS in general, including business model.**

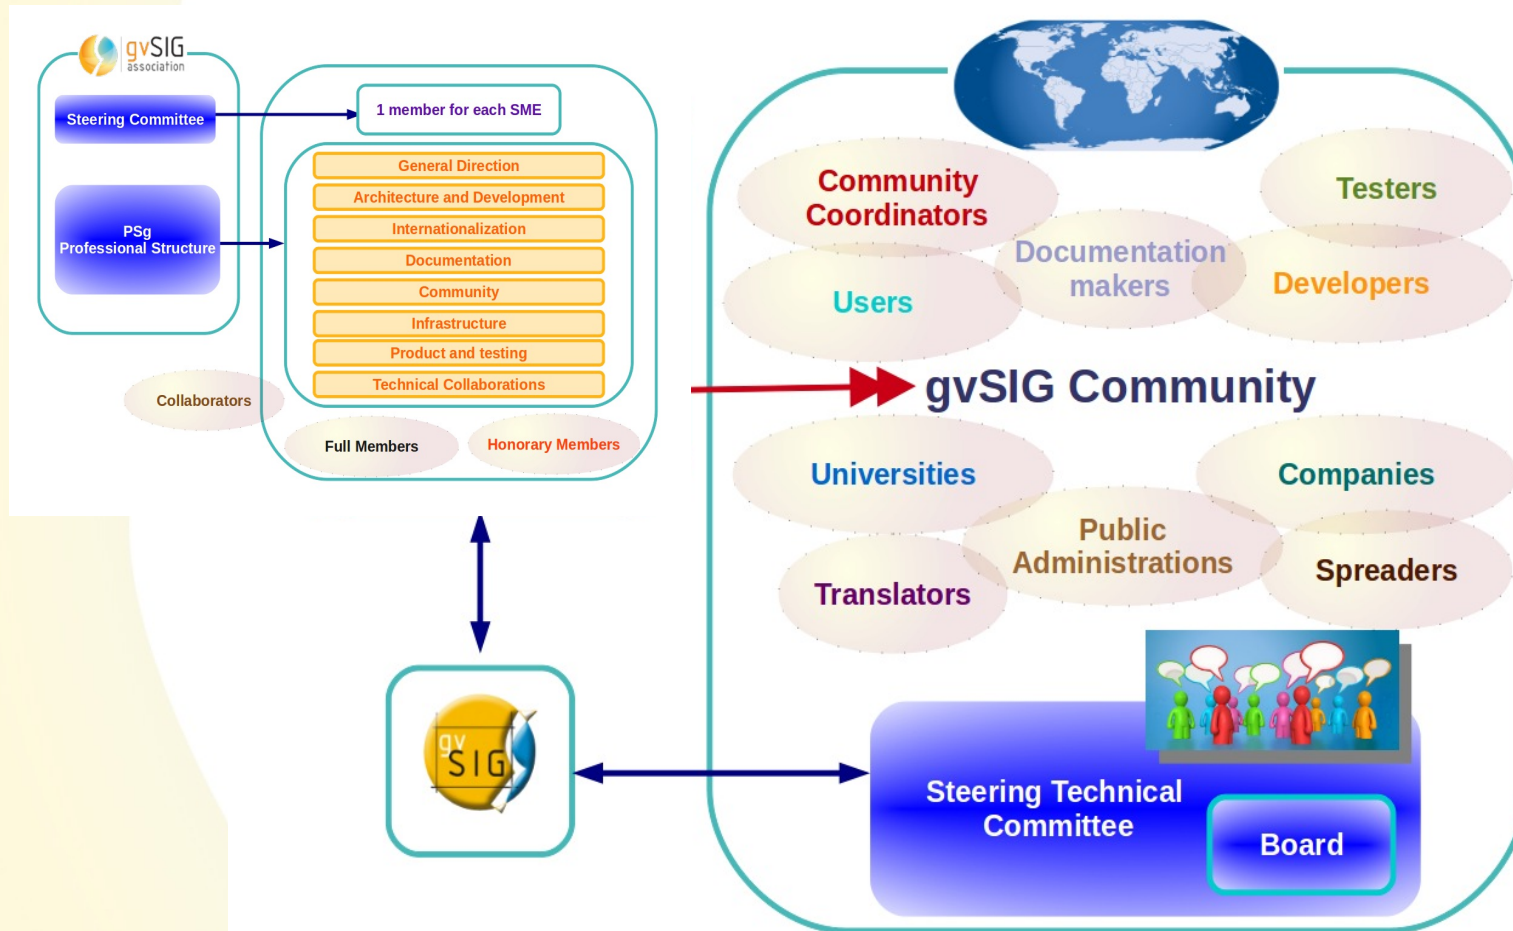

3. gvSIG's Community

- Many FOSS project communities are intended to be organized ONLY around voluntary developers, working on the projects on their spare time.
- gvSIG wants to include those volunteers, but also SME involved in developments based on gvSIG.
- These SMEs contribute to the **sustainability of the project** by means of building a business model around gvSIG.

3. gvSIG's Community

- Which **roles** are identified on the **gvSIG Community**?
 - Developers
 - Users (the best testers!)
 - Testers
 - Translators (docs. and interface)
 - Documentation makers
 - Development Business Managers
 - SME offering software services
 - Spreaders
 - Community coordinators
- Those areas are not isolated, nor the people that work on them.
- We promote the **synergies between them**.
- Each role is related to a different area of the gvSIG project (PSg)

3. gvSIG's Community

3. gvSIG's Community

- Each area of the PSg has lots of collaborators...
- **How do we organize the task to be done?**
 - Pointing out a manager for each area
 - Creating thematic communities,
 - and also geographical communities (linguistic)
- The **Community Management Area** of the PSg is the coordination core.
- The **coordinator groups** of each community arises from the own community. They are responsible for committing their own goals at their own way, being an organized net. gvSIG respects their sovereignty.

3. gvSIG's Community

- How do we create this organized net?
 - By identifying **people at different countries** with technical and social skills interested on gvSIG and FOSS4G
 - Contacting them in order to create a **coordinator group**
 - Making **spreading efforts** together (events, workshops, presentations, social networking, etc.)
- The main goal is to:
 - encourage the development of gvSIG Community all over the world
 - provide new ideas about software production
 - promote technology independence on GIS

3. gvSIG's Community

Examples of organized communities that are on the way right now (next “La Comunità Italiana de gvSIG”):

[What are the community groups?](#)

[Information for group coordinators](#)

Geographical communities:

 **Argentina:**
[gvSIG - ar](#)

 **Brazil:**
[gvSIG - br](#)

 **Russia:**
[gvSIG - ru](#)

Linguistic Communities

 **French-speaking:**
[gvSIG - fr](#)

And we are working on:

- Germany
 - United Kingdom
 - Uruguay
 - Chile
 - Venezuela
-
- Campus (university, etc.)
 - Women (sopde.es)

3. gvSIG's Community

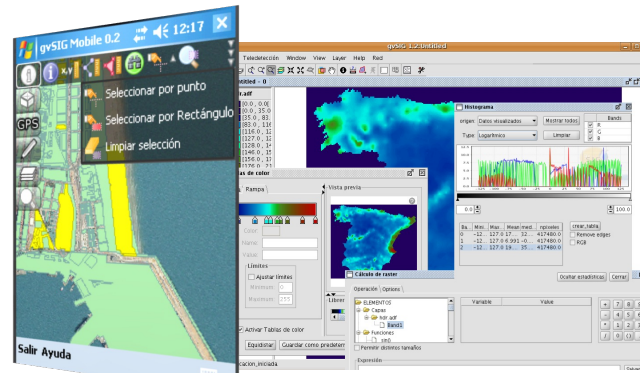

- The Community has **collaborative tools** in order to carry out its work:
 - **Technical:**
 - Open Source Observatory and Repository
 - Subversion, mailing lists, trackers, ...
 - Plone for: docs, String Internationalization, official projects, ...
 - **Spreading:**
 - Social networks, planet, spreading content, case studies,
 - **Philosophical:**
 - Blog, OpenPlanet, ...

3. gvSIG's Community

- The Community Management makes special effort in order to **promote the organization of local gvSIG and FOSS4G events.**
- For 2011 we have helped to achieve:
 - **Quarte Giornate Italiane di gvSIG (Italia - Udine)**
 - 2^o gvSIG Day in Nottingham (UK - Nottingham)
 - 1^o Jornadas Nacionales de gvSIG (Uruguay - Montevideo)
 - 1^o Journée gvSIG à Rennes (Rennes - France)
 - 1^o Jornadas Nacionales de gvSIG Argentina (Tucumán)
 - 3^o Jornadas Latinoamerica y Caribe (Itaipú - Brazil)
 - 7^o Jornadas Internacionales gvSIG (Valencia - Spain)

3. gvSIG's Community

- If we achieve all these goals, we will be building:
 - a new way of **producing software**
 - a new way of **doing business**
