# Testing plan

There are different projects created on gvSIG that allow to make a testing plan to check the access to the main formats supported by gvSIG on Windows and Linux in a quick way.
These projects can be downloaded from
http://downloads.gvsig.org/download/testing/Testdata.tar.bz2

| Project name | Description | Expected results |
|---|---|---|
| Shp | Shapefiles in different projections and with reprojected layers |  |
| Shp_labels | Shp with different labellings (basic, halo option, bullet points and labelling only selected features) |  |
| Csv | Csv as event layer |  |

| | | |
|---|---|---|
| Xls | Excel sheet loading |  |
| CAD | dxf, dgn, dwg loading |  |
| Gkml | gml and kml loading |  |
| Dbf | dbf loading |  |
| Raster | asc, bmp, ecw, jp2, jpg, lan, mrsid, png and tif loading |  |

| | | |
|---|---|---|
| OGC_wms | wms and wmts loading |  |
| OGC_wfs | wfs loading |  |
| OGC_wcs | wcs loading | |
| OSM | OSM tiles loading |  |
| PostGIS | Vector PostGIS loading |  |

| | | |
|---|---|---|
| Layout | Project with layout |  |
| Portableview | Project with Portable view |  |
